

Neles™ top entry rotary control valve

Series T5

Neles T5 series top entry rotary ball valves are designed to meet the requirements of chemical, petro-chemical and refining industries with improved process safety and efficiency of plant. T5 series valves with famous trunnion mounted Stemball™ design are suitable with wide rangeability for demanding heavy duty rotary control applications such as crude oil, hot residual oil, LPG and other hydrocarbon gases and vapors under medium and high pressures. Unique Stemball design combined with anti-cavitation and low noise Q-trim™ technology are making the T5 series valve most suitable with wide rangeability for demanding control applications like anti surge and blow down services. The new high noise reduction Q2-trim™ is available for gas applications.

Features

Wide control rangeability

- Turndown ratio up to 150:1.

Alternative for globe control valves

- ASME globe valve face-to-face.
- Increased capacity.

Stable / accurate control

- Load caused by flow is carried by strong bearings.
- The single-piece Stemball® construction eliminates backlash, minimizing lost motion (deadband) in control applications.

Controls fluids with entrained solids

- Can handle fluids forming coke and crystallizing substances at high temperatures.
- Self cleaning trim design – scraping seat.

Tightness

- Long life metal to metal seats, for Class V tightness.
- Soft seated design for Class VI tightness.

Added security

- Fire-tested API 607.
- Stemball construction. – Anti-blow-out design.
- Rugged one-piece body resists pipe stresses.

Noise/cavitation abatement

- Patented Q-Trim design provides up to 18 dB(A) noise

- attenuation, self-flushing for impure fluids.
- Q-Trim + valve outlet attenuator plate construction extends Q-Trim performance for higher pressure drop ratios and provides extra noise attenuation.
- In severe applications – such as gas to flare or steam blow down – QX-Trim gives the best possible support to the seat by keeping spherical contact.
- High noise reduction Q2-trim for gas applications

Environmental design

- Rotary operation reduces emissions dramatically compared with most linear valves using standard packing.
- Packing constructions to meet ISO 15848 and US Clean Air Act requirements are available.
- Separate bonnet construction makes it possible to upgrade the valve to new requirements without modifying the valve body.
- Optional weld ends allow a 100% emission-free pipeline connection.

Options

- Oxygen construction for gaseous oxygen service.
- Low emission design construction to meet ISO 15848

Technical specification

Product type: Top entry, trunnion mounted, single seated rotary control valve.

Ratings: See table below.

Sizes: See table below

Type T5 Flanged, reduced bore 2" - 16", full bore 1" & 1 1/2", Face-to-face acc. to ISA-S75.08.01 = IEC 60534-3-1, (globe valve length)..

Type T4 Weld ends, reduced bore 2" - 16", full bore 1" & 1 1/2", face-to-face acc. to API 6D class

600.

Temperature range:
 Seat A -50 ...+450 °C / -58...+840 °F
 Seat E1 -50 ...+450 °C / -58...+840 °F
 Seat F -200 ...+400 °C / -320...+750 °F
 Seat R -30 ...+100 °C / -22...+150 °F
 Graphite packing must be used above 230 °C / +450 °F or in fire safe duty.

Standard materials:
 See table on page 5.

Max. shut-off pressure:
 See table on page 6 & 7.

Max. control pressure:
 See table on page 3.

Flow characteristic: Top 5 modified equal percentage. Q-Top 5 modified linear. See curves on page 3.

Flow direction: Flow from the seat side.

Flow capacity: See table on page 3.

Rangeability: 150:1.

Valve ball rotation: Clockwise to close.

Fire safe: API 607.

Shut-off classification
Standard tightness: Metal seated; ASME/FCI 70.2 Class V. Soft seated; ASME/FCI 70.2 Class VI.

Options
 Q-trim In sizes 8" and larger
 QX-trim In sizes 01" - 06"
 QXR-trim In sizes 01" - 06"

QA/QXA-trim (Q-trim + outlet attenuator)
 In all sizes

Q2G-trim In sizes 3" - 16"

V-port low Cv trim In sizes 01" - 02".
 For details see page 3.

Max. allowable Δp in continuous throttling control with cobalt based hard facing seats

Note: Values given above are for pure fluids. For applications involving cavitation, impurities or excessive noise, contact Valmet for max. Δp .

Inherent flow characteristic

Noise attenuation

Trim options

Q-Trim®

For noise and cavitation abatement.

QX/QXR-Trim

For noise and cavitation abatement. Drilled construction, no inserts.

QX = Full capacity

QXR = Reduced capacity

V-port low C_v trim

V-port for flow reduction.

For C_v values see table below (Maximum C_v values).

Reduction level is indicated after size.

Q-Trim + attenuator plate

Attenuation plate construction extends Q- and QX-trim performance for higher pressure drop ratios and provides extra noise attenuation.

Maximum C_v -values

Q2 Trim for gas applications

With new Q2-Trim technology, the noise reduction can be up to -30 dB(A). This creates the optimum solution for noise attenuation.

STANDARD SEAT OPTIONS

A Metal seats

Ball seat:	Stainless steel + cobalt based hard facing
Seat seal:	Graphite
Back ring:	316 SS
Spring:	Inconel® X-750
Temp. range:	-50 ... +450 °C / -58...+840 °F
Size range:	01"....16" / DN 25....400
Service:	General service and fire safe applications.

E1 Metal seat for control service

Ball seat:	Stainless steel + cobalt based hard facing
Seat seal:	Graphite
Back ring:	316 SS
Spring:	Inconel® X-750
Temp. range:	-50 ... +450 °C / -58...+840 °F
Size range:	T5/T4 04"....16" / DN 100.... 400
Service:	Control service, ejector style seat, lower torque in modulating control.

F Bellows seat

Ball seat:	Stainless steel + cobalt based hard facing
Bellows:	W.no 1.4418 = Avesta® 248 SV
Temp. range:	-200 ... +400 °C / -330...+750 °F
Size range:	T5/T4 01".... 8" / DN 25.... 200
Service:	Control and shut-off applications at low and high temperatures.

R63 Soft seat, fire safe design

Ball seat:	POM (Delrin®)
Seat seals:	Viton® GF O-ring and Graphite
Back rings:	316 SS
Spring:	Inconel® X-750
Temp. range:	-30 ... +100 °C / -22...+150 °F
Size range:	T5/T4 1 1/2".... 16" / DN 40.... 400
Service:	Control and shut-off applications.

Delrin and Viton are registered trademarks of E.I. DuPont Co.
 Avesta is a registered trademark of Avesta Stainless Co.
 Inconel is a registered trademark of Inco.

*) See K dimension from tables on pages 6 and 7.

HOW TO ORDER

To specify a control valve, make a selection from each designation below. These codes create a complete valve model code. The valve model number expresses the standard product construction. An extensive range of unlisted options and variations are available. For options not shown, or to enter an order, contact your local Valmet sales representative.

Example:

1.	2.	3.	4.	5.	6.	7.	8.	9.	10.	11.		
Q	-	T5	F	E	04	A	A	A	03	G	/	-

1. Sign	Trim options
Q	Low noise trim for gas and liquid applications NPS 8" and larger
QX	Multichannel Q-ball for gas and liquid applications NPS 6" and smaller
QXR	Reduced capacity multichannel Q-ball for gas and liquid applications NPS 6" and smaller
QA	Low noise trim + attenuator plate in downstream flow port of body for gas applications NPS 8" and larger *
QXA	Multichannel Q-ball + attenuator plate in downstream flow port of body for gas applications (in sizes NPS 06" and smaller) *
QRA	Reduced capacity multichannel Q-ball + attenuator plate in downstream flow port of body for gas applications (in sizes NPS 06" and smaller)
A	Attenuator plate in downstream flow port of body for gas application *
Q2G	Q2-trim for gas applications
Q2GH	Q2-trim for gas applications, high capacity version

*) For liquid applications customized baffle plates are used. Code "A" must be replaced with "Y" and explanation must be given.

2. Sign	Series
T5	Reduced bore 2" - 16", full bore 1" & 1 1/2", flanged.
T4	Reduced bore 2" - 16", full bore 1" & 1 1/2", weld-ends.

3. Sign	Pressure rating
D	ASME Class 300.
F	ASME Class 600.
M	PN 40.
N	PN 63.
P	PN 100.

4. Sign	Construction
E	PTFE bearings. Temperature range -50 ... +230 °C.
B	Metal bearings. Temperature range -50 ... +450 °C.
C	Cryogenic, metal or PTFE bearings F-seat only. Temperature below -50 °C.
Z	Oxygen construction BAM tested non-metallic materials - T = -50 ... +200 °C - Max pressure based on body rating - Metal bearings, cobalt based alloy - seat type F, WC-Co coated ball and seats (other seat types shall be consulted with Product Center) - Oxygen cleaning acc. to internal procedures.

5. Sign	Size (in inch)
	01, 1.5, 02, 03, 04, 06, 08, 10, 12, 14, 16.

6. Sign	Body	Studs
A	CF8M	B8M
D	WCB	L7M

7. Sign	Ball
A	CF8M + hard chrome with metal seats.
D	CF8M + NiBo.

8. Sign	Seat
A	Metal seat General service and fire safe applications.
E	Metal seat for control service. Ejector style seat, lower torque in modulating control.
F	Bellows seat Shut-off applications at low and high temperatures.
R	Soft seat Control and shut-off applications for high pressure gas.

9. Sign	Seat seal	Bonnet gasket	Gland packing	Seat	Construction	Bearing
02	Graphite	Graphite	Graphite	A, E1	E, C	PTFE
03	Graphite	Graphite	Graphite	A, F, E1	B, C	metal
63	Viton® GF	Graphite	Graphite	R	E, B	PTFE or metal

10. Sign	Gland packing options
G	Live loaded graphite packing
G1	Live loaded graphite packing, ISO 15848-1 certified

11. Sign	Flange facing
05	Ra 3.2 - 6.3 / RMS 125 - 250 Ring joint.
